

LID PLACERS

Industry Solutions Since 1949

IDEAL-PAK AUTOMATIC LID PLACER FOR HALF-PINT, PINT, QUART AND GALLON PLASTIC OR METAL CONTAINERS

Ideal-Pak Model LPA-0000 Automatic Lid Placer shown with optional Ideal-Pak CR-1-2675 Roller Closing Machine and Conveyor.

AUTOMATE PRODUCTION

Ideal-Pak's Lid Placing Machines are the high performance container handling solution for a variety of applications requiring friction lids from half pint to 1 gallon containers. Reduce labor costs by fully automating your in-line filling operation with an Ideal-Pak automated lid placer system engineered to dispense and position lids (before closing) on filled containers.

The LPA-0000 will place metal and plastic lids from 1/2 pint to one gallon. Individual lids are held above a conveyor and as a container passes under it the lid is released.

The container with lid is conveyed through a set of star wheels, ensuring the lid is seated properly prior to entering a closer.

STANDARD PRODUCT FEATURES

- 24" Vertical Lid Storage.
- Adjustable for 1/2 Pint - Gallon Lids.
- External & Internal Star Wheels.
- Fast and Efficient.
- Hardware to Mount on an Ideal-Pak Roller Closer.
- Places lids on Open Top, Friction, and plastic containers.
